

COMPENG 2SH4 Project – Statement of Contribution

Your Group Number _____ Jobs and Musk _____

Your Name _____ Zihan Lin _____

Your Team Member's Name _____ Haixiongtao Nie _____

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

- Iteration0
- Iteration1A, and B
- Feature 2-Snake Food Consumption
- Feature 3-Snake Death Check
- Debugging

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

- Iteration2, and B
- Iteration3
- Feature 1
- Feature 2-Snake Body Growth
- Additional iterations
- Debugging

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

My experience in my first collaborated software development was amazing. Me and my groupmate collaborated very well, we discussed each person's parts and then assemble them together, after that we just debugged our code and checked our memory leaks. It was a good team working experience. The only thing that should be improved is that my groupmate is good at coding so sometimes he will help me with my part.
